

COVID-19 vaccine and breastfeeding

At this time the Australian and New Zealand Governments support the use of an approved COVID-19 vaccination in breastfeeding women. Breastfeeding women do not need to stop breastfeeding to receive the vaccine.

**If you need help with breastfeeding call:
Australia 1800 686 268
New Zealand 0800 933 922**

There is no evidence of additional risks to breastfeeding women or their children from an approved COVID-19 vaccine. COVID-19 vaccines approved for use in Australia and New Zealand do not contain a live virus.

Prior to receiving the COVID-19 vaccination it is important that breastfeeding women discuss the COVID-19 immunisation with their health professional.

Research shows that antibodies made by a mother's body after having COVID-19 are available to her child via her breastmilk.
