

## Tree Removals

The table below lists the details of the trees to be removed, including tree location, tree species and condition assessment. For further location details, please refer to the street map outlining all removals, replacements and infill planting. Alternatively, each tree has had a reference tag attached and these tags will correspond to the reference number below for on-site identification.

Ref No.	Street Address	Assessment Outcome	Follow Up Action	Current Tree Species	Tree Condition Assessment (*Useful Life Expectancy <2 Years)	Tree Image
1	1/10 Flora Road	Tree to be removed	No replacement tree to be planted	<i>Crataegus sp.</i>	Useful Life Expectancy <2 Years	
2	14 Flora Road	Tree to be removed	Replacement tree to be planted	<i>Crataegus sp.</i>	Useful Life Expectancy <2 Years	

## Infill Planting Locations

# Street Overview

The map below details the removals, replacements and infill plantings. All other trees have been assessed as having more than two years' useful life and will be retained.

## Street Overview Legend

-  Tree to be Removed and Replaced
-  New Tree
-  Tree Removed with No Replacement

## Proposed Tree Species Options

Council’s Street Tree Strategy team has created three (3) options to choose from using the most appropriate species for the location.

### Option 1 – Single species (both sides of the road)

<i>Acer campestre</i> 'Elsrijk' (Elsrijk Maple)	
	<p>A small tree with a dense round canopy and a somewhat corky bark. Small leaves with rounded lobes, dark green in summer, which turn a beautiful clear yellow in the autumn. Green inconspicuous flowers from September to October. Paired samaras spread throughout the tree and hang in clusters well into winter.</p> <p><b>Mature Size</b></p> <p><b>Height x Width (m):</b> 7m x 3m</p> <p><b>Form:</b> Oval</p>

**Option 2 – Single species (both sides of the road)**

<i>Tristaniopsis laurina</i> 'Luscious' (Luscious Kanooka)	
	<p>An Australian native. Leaves are dark green, shiny and large. New growth starts in a distinctive copper colour and further interest appears over time with the branches developing deep purple coloured bark which peels back to reveal a smooth, cream trunk. Flowers are yellow and sweetly perfumed, appearing in clusters through summer.</p>
 	<p><b>Mature Size</b></p> <p><b>Height x Width (m):</b> 8m x 4m</p> <p><b>Form:</b> Oval</p>

**Option 3 – Single species (both sides of the road)**

<i>Olea europaea</i> 'Swan Hill' (Swan Hill Olive)	
	<p>A small to medium tree with slender, greyish-green foliage with a silvery underside. This variety does produce white flowers in spring; they are generally sterile and so will produce very little fruit. This is a tough tree which, once established, will tolerate periods of dryness.</p>
	<p><b>Mature Size</b></p> <p><b>Height x Width (m):</b> 7m x 10m</p> <p><b>Form:</b> Round</p>
