

## Tree Removals

The table below lists the details of the trees to be removed, including tree location, tree species and condition assessment. For further location details, please refer to the street map outlining all removals, replacements and infill planting. Alternatively, each tree has had a reference tag attached and these tags will correspond to the reference number below for on-site identification.

Ref No.	Street Address	Assessment Outcome	Follow Up Action	Current Tree Species	Tree Condition Assessment (*ULE <2 Years)	Tree Image
7	1 Inglewood Court	Tree to be removed	Replacement tree to be planted	<i>Prunus cerasifera Nigra</i>	Tree in senescence. Reduced vigour.	

## Infill Planting Locations

The table below lists the details of the locations where trees will be planted in currently vacant sites along Inglewood Court, Wheelers Hill. For further location details, please refer to the street map outlining all removals, replacements and infill planting.

No.	Street Address	Assessment Outcome	Follow Up Action
1	23 Winterton Drive (In Inglewood)	Vacant Site	New tree to be planted

# Street Overview

The map below details the removals, replacements and infill plantings. All other trees have been assessed as having more than two years' useful life and will be retained.

## Street Overview Legend

-  Tree to be Removed and Replaced
-  New Tree
-  Tree Removed with No Replacement

## Proposed Tree Species Options

Council’s Street Tree Strategy team has created three (3) options to choose from using the most appropriate species for the location.

### Option 1 – Single species (both sides of the road)

<i>Tristaniopsis laurina</i> ‘Luscious’ (Luscious Kanooka)	
  	<p>An Australian native. Leaves are dark green, shiny and large. New growth starts in a distinctive copper colour and further interest appears over time with the branches developing deep purple coloured bark which peels back to reveal a smooth, cream trunk. Flowers are yellow and sweetly perfumed, appearing in clusters through summer.</p>
<p><b>Mature Size</b></p> <p><b>Height x Width (m):</b>      8m x 4 m</p> <p><b>Form:</b>                              Oval</p>	

**Option 2 – Single species (both sides of the road)**

<i>Callistemon viminalis</i> (Dawson's River)	
	<p>This is a pretty bird-attracting tree with a heavy crown due to the profusion of brilliant red flowers in spring and summer. It is the weight of these flowers that gives it a pendulous habit.</p>
	<p><b>Mature Size</b></p> <p><b>Height x Width (m):</b> 6-8m x 6-8m</p> <p><b>Form:</b> Round</p>

**Option 3 – Single species (both sides of the road)**

<i>Corymbia eximia</i> 'Nana' (Dwarf Yellow Bloodwood)	
	<p>The foliage is broad with a strong green colour and may turn a paler yellow/green in the colder months. In spring the tree puts on an eye-catching display covering itself in creamy yellow flowers, attracting nectar-loving birds.</p>
	<p><b>Mature Size</b></p> <p><b>Height x Width (m):</b> 6-8m x 4-6m</p> <p><b>Form:</b> Round</p>
