

Tree Removals

The table below lists the details of the trees to be removed, including tree location, tree species and condition assessment. For further location details, please refer to the street map outlining all removals, replacements and infill planting, or alternatively each tree has had a reference tag attached, these tags will correspond to the reference number below for on-site identification.

Ref No.	Street Address	Assessment Outcome	Follow Up Action	Current Tree Species	Tree Condition Assessment (*ULE <2 Years)	Tree Image
10	33 Outlook Road	Tree to be removed	Replacement tree to be planted	<i>Grevillea sp.</i>	Some dieback and reduced vigour (health) through canopy	
11	3/21 Herbert Street	Tree to be removed	Replacement tree to be planted	<i>Prunus cerasifera Nigra</i>	Significant decay throughout.	
12	2/21 Herbert Street	Tree to be removed	Replacement tree to be planted	<i>Eucalyptus leucoxylon</i>	Tree in decline, reduced vigour (health), not expected to recover	

Ref No.	Street Address	Assessment Outcome	Follow Up Action	Current Tree Species	Tree Condition Assessment (*ULE <2 Years)	Tree Image
13	16 Outlook Road	Tree to be removed	Replacement tree to be planted	<i>Prunus cerasifera Nigra</i>	>80% dead	
14	8 Outlook Road	Tree to be removed	Replacement tree to be planted	<i>Eucalyptus leucoxylon</i>	<75% vigour (health)	

Infill Planting Location

The table below lists the details of the locations where trees will be planted in currently vacant sites along Outlook Road, Mount Waverley. For further location details, please refer to the street map outlining all removals, replacements and infill planting.

No.	Street Address	Assessment Outcome	Follow Up Action
1	172 Huntingdale Road	Vacant Site	New tree to be planted
2	2 - 20 Essex Road	Vacant Site	New tree to be planted
3	2 - 20 Essex Road	Vacant Site	New tree to be planted
4	2 - 20 Essex Road	Vacant Site	New tree to be planted
5	2 - 20 Essex Road	Vacant Site	New tree to be planted

No.	Street Address	Assessment Outcome	Follow Up Action
6	22 - 30 Outlook Road	Vacant Site	New tree to be planted
7	22 - 30 Outlook Road	Vacant Site	New tree to be planted
8	22 - 30 Outlook Road	Vacant Site	New tree to be planted
9	36 Outlook Road	Vacant Site	New tree to be planted
10	41 Outlook Road	Vacant Site	New tree to be planted
11	44 Outlook Road	Vacant Site	New tree to be planted

Street Overview

The map below details the removals, replacements and infill plantings. All other trees have been assessed as having more than 2 years useful life and will be retained.

Street Overview Legend

-  Tree to be Removed and Replaced
-  New Tree
-  Tree Removed with No Replacement

Proposed Tree Species Options

Council's Street Tree Strategy team has created four (4) options to choose from using the most appropriate species for the location.

Option 1 – Combination of species planted in an alternating pattern on both sides of the road

Acer platanoides 'Crimson Sentry' (Crimson Sentry Norway Maple)

This is a flashy crimson foliated maple with dense upright branching. It has a compact growth habit with its large crimson leaves in summer turning to gold and orange in autumn. Adds great colour contrast foliage. A small tree with greyish-black bark that is lightly textured.

Mature Size

Height x Width (m): 7 x 4 m

Form: Upright

Eucalyptus leucoxylon 'Eukie Dwarf' (Dwarf Yellow Gum)

This shapely dwarf Eucalypt has a light, open canopy with a single trunk and smooth bark that sheds. Its grey-green leaves once mature are offset by masses of nectar rich, pink, red and sometimes cream blossoms from late autumn to early summer, attracting native birds to the garden.

Mature Size

Height x Width (m): 6 – 8 x 4 – 6 m

Form: Round

Option 2 – Combination of species

Power line side of road

Lagerstroemia indica x L. fauriei 'Sioux' (Sioux Upright Crepe Myrtle)

Creating quite the visual impact over a lengthy period, this variety offers masses of intense, pink flowers over summer, followed by stunning, rich foliage colour in tones of yellow, red and orange through autumn, before shedding its leaves. When mature, the bark of this variety will peel, creating a mottled effect to reveal the beautiful caramel-pink colour of its under bark.

Mature Size

Height x Width (m): 5 x 4 m

Form: Round

Non-power line side of road

Corymbia citriodora 'Scentuous' (Dwarf Scented Lemon Gum)

This is a slightly narrow domed tree that doesn't shed its branches. It has a smooth trunk that may be slightly mottled. Leaves are narrow and highly aromatic when crushed, smelling strongly of lemon. This tree features lovely cream-coloured flowers in summer.

Mature Size

Height x Width (m): 7 x 3 m

Form: Oval

Option 3 – Combination of species

Power line side of road

Cercis canadensis 'Forest Pansy' (Forest Pansy Redbud)

This small, attractive tree has spectacular heart-shaped, burgundy-coloured leaves that continually change colour throughout the year. A rich purple in spring, the foliage transforms to green over summer, followed by a multi-coloured autumn display in tones of red, apricot and gold. The branches have a distinctive, smooth, dark brown wood which contrasts well with the blossom-like pink flowers that are born before the re-emergence of leaves in spring.

Mature Size

Height x Width (m): 5 – 7 x 5 – 7 m

Form: V Shape

Non-power line side of road

Lophostemon confertus (Queensland Brush Box)

An Australian native. Leaves are dark green, shiny and large. New growth starts in a distinctive copper colour and further interest appears over time with the branches developing deep purple-coloured bark which peels back to reveal a smooth, cream trunk. Flowers are yellow and sweetly perfumed, appearing in clusters through summer.

Mature Size

Height x Width (m): 10 x 15 m

Form: Oval

Option 4 – Combination of species

Power line side of road

<i>Acer platanoides</i> 'Crimson Sentry' (Crimson Sentry Norway Maple)	
	<p>This is a flashy crimson foliated maple with dense upright branching. It has a compact growth habit with its large crimson leaves in summer turning to gold and orange in autumn.
