

# MONASH REGISTER OF PATHWAYS

The City of Monash Register of Pathways has been prepared in accordance with Section 17 and Schedule 1 of the Road Management Act 2004 and is a register of those footpaths and shared paths which Council has decided are included in the Road Management Plan.

The Pathway Hierarchy is defined in the Monash Road Management Plan. The Monash Road Management Plan provides details on inspection and maintenance standards for each class of pathway.

The City of Monash is responsible for the management and maintenance of most paths on arterial roads within the limits defined in the Code of Practice issued under the Road Management Act. The details of the division of responsibility is defined in the Code of Practice for Operational Responsibility for Public Roads. Contact the Coordinator Strategic Asset Management for any queries in this regard.

**Footpath** segments within the road reserve that are either **MEDIUM** or **HIGH** path hierarchy are included in the Monash Register of Pathways. All other paths in public roads and arterial roads within the municipality are categorized as **LOW** path hierarchy. Designated Shared Paths not in the road reserve but with significant traffic volumes are included in this register and are inspected and maintained in accordance with the Road Management Plan. Other paths in reserves, including general shared paths, are not included in the Road Management Plan but are inspected and maintained in accordance with the Asset Management Plan.

**Shared Paths.** High traffic volume shared path trails are included in the Monash Road Management Plan. Only segments of these shared path trails that are constructed to current council standards are included in this register. Other segments are treated as footpaths for the purpose of inspection to the Road Management Plan. Constructed branch connections to the main trail are included.
