

MONASH REGISTER OF PUBLIC ROADS

The City of Monash Public Road Register has been prepared in accordance with Section 17 and Schedule 1 of the Road Management Act 2004 and is a register of those roads which Council has decided are reasonably required for public use.

The Road Hierarchy is defined in the Monash Road Management Plan. The Monash Road Management Plan provides details on inspection and maintenance standards for each class of road.

The City of Monash is responsible for the management and maintenance of parts of the arterial roads listed below. This division of responsibility is outlined in the Monash Road Management Plan and is derived from the Code of Practice for Operational Responsibility for Public Roads.

Un-constructed lanes and right-of ways are generally not included in the Public Road Register until they are constructed to Council Standards.

Changes to the road network within the municipality, including changes to road reserve boundaries or road hierarchy as well as additions and removals since the first implementation of the Public Road Register (1 July 2004), are included in the Monash Public Road Change Register.

Footpath segments within the road reserve that are either MEDIUM or HIGH path hierarchy are included in the Monash Path Register. All other paths in public roads within the municipality are categorized as LOW path hierarchy. Shared Paths not in the road reserve that are specifically designated for commuter use are included in the path register and are inspected and maintained in accordance with the Road Management Plan. Other paths in reserves, including general shared paths, are not included in the Road Management Plan.

Private, named roads within the municipality have been included for reference only. The City of Monash neither inspects nor maintains these roads. Questions relating to these roads should be directed to the land owner or responsible authority.

ISSUED BY:	COORDINATOR STRATEGIC ASSET MANAGEMENT	ISSUE DATE:	31 July 2021
